Assumptions and boundaries

- Microsoft usage reports normally lag by 24–48 hours.
- Reported source bytes are a pricing baseline, not guaranteed stored bytes; versions, changes and growth can increase protected storage.
- SharePoint savings are limited to paid overage actually eliminated, not archived bytes multiplied by a rate.
- This document is not a protection certificate, archive authority or instruction to remove customer content.

Microsoft SharePoint overage input: US\$0.20/GB/month (A\$292.57 per TB a month at US\$1 = A\$1.43); source: <https://learn.microsoft.com/en-us/microsoft-365/documentprocessing/syntex-pay-as-you-go-services?view=o365-worldwide>, source last updated 1 June 2026.
